PROGRAM GCP(443)-VEGETABLE SEED

- I. GENERAL: Contracts under the subject program for the production of seed have been negotiated by the Grain Products Branch employing Form GFSP-1367, entitled "Vegetable Seeds - Offer of Sale (Production of 1944) Program DA". The reference to Program DA is incorrect, since this is a GCP Program and the contracts should have been numbered in the FSC(F) series.
- II. CONTRACT PROVISIONS: The contract provides that the contractor shall furnish all of the seed produced on the acreage covered by the contract, at prices yet to be established by a committee in accordance with Section 12 thereof, but within certain specified minimum and maximum prices for each variety of seed. It should be noted that certain sections of an earlier contract, Form GFSP-1318, have been incorporated into the contract used in this program. Your attention is directed particularly to Section 14 of Form GFSP-1318 which indicates the manner in which the invoice shall be prepared and notes the supporting documents required to be submitted.
- III. PROCESSING OF VOUCHERS: Vouchers may be submitted under this program as the seed is delivered and prior to the fixing of definite prices by the committee. All such vouchers, if otherwise in order, shall be certified for payment at the minimum price per pound specified for the applicable variety of seed in Section 12 of the contract.
- IV. PROCESSING OF SUPPLEMENTAL VOUCHERS: In the event the prices established by the committee are higher than the minimum prices on which prior payment was based, the contractor will submit supplemental vouchers representing the difference between the minimum price and the established price. Such vouchers shall be cross referenced to each prior voucher to which they relate.
